Pick out any "one" video that is on YouTube. I'll download from YouTube and convert the video file into any format that you wish (even MP3) and then send it over to you via fiverr and or if it is larger you can download from my private server. This is useful when you want to take someone elses video off of you tube and edit it or convert it for advertising and re-upload back to YouTube. Or maybe you want to use a video in Powerpoint or iMovie
